

Jonathan Navarro

(956) 367-6193 | jonathan63592@gmail.com | [MyWebsite](#) | [Github](#)

EDUCATION

Bachelor of Science in Computer Science The University of Texas Rio Grande Valley, Edinburg, TX
Graduated: May 2026 | GPA: 3.77 | Magna Cum Laude Honors: Dean's List (2023-2024), President's List (2024-2026)

PROFESSIONAL EXPERIENCE

Food Delivery Driver | DoorDash 2023 – Present

- **Efficiently** delivered food and beverages from 100+ local restaurants, Gold Status driver.
- **Maintained** vehicle and equipment in professional condition; prioritized food freshness and delivery speed.
- **Communicated** effectively with customers to confirm orders, address concerns, and ensure satisfaction

Drywall Finisher | Navarro's Drywall 2023

- **Measured** dimensions and executed drywall layouts for residential and commercial projects
- **Installed** metal corner beads, applied joint compound, and repaired damaged surfaces with precision
- **Collaborated** with team members, supervisors, and clients; maintained safety protocols with hazardous materials

HACKATHON ACHIEVEMENTS

RGV Tutor – Offline AI Learning App 2026 (2nd Place, **AI/ML** Hackathon) Flutter, Node.js, Local LLM (Ollama), SQLite | github.com/Grimgear76/RGV_Tutor

- **Developed** offline-first tutoring app designed for low-connectivity environments with 2nd-place award in **AI/ML** track
- **Integrated** local LLM (Ollama) for **API-free** AI assistance; built features including quizzes, flashcards, and digital Book Hub
- **Optimized architecture** for low-end devices; demonstrated impact in resource-constrained educational settings

UTRGV Frontera Gemini Hackathon 2024 – Financial Analytics Dashboard (1st Place) React, Node.js, Express, MongoDB | github.com/Grimgear76/frontera-hackathon

- Built full-stack **financial analytics** application to visualize business spending and savings trends; won 1st place in Financial category
- **Designed** interactive dashboards and RESTful APIs; **delivered** complete, award-winning solution within 24 hours

Hack Research – Mechanical Computation with Roons 2025 Research Paper

<https://www.overleaf.com/read/vswhdhzqzyvy#fd4330>

- **Contributed** to research on mechanical computation systems using Roons.
- Assisted with experimental design and **technical documentation**.

PROJECTS

Pokémon Battle Bot – Reinforcement Learning AI Python, Stable-Baselines3, PPO, Gymnasium
github.com/Grimgear76/Pokemon-Battle-Bot

- **Engineered** a **reinforcement learning** agent to autonomously battle in Pokémon Showdown using PPO algorithm
- Built custom **Gymnasium** environment with reward shaping and action masking for efficient training
- **Optimized** agent performance through iterative environment design and hyperparameter tuning; monitored metrics via **TensorBoard**

RAPP956 Rise Above Pressure Program Website Vite, React, CSS Modules, Cloudflare Pages
<https://rapp956-website.pages.dev/>

- Built a single-page **marketing website** to pitch a youth mental health & life skills program to Rio Grande Valley school districts with **real visitors/users**.
- **Architected** a multi-section React SPA (Hero, Problem, Program Components, Speakers, Contact) with anchor-based navigation and no external routing library
- **Styled** with custom CSS Modules using a gold/black design system and Google Fonts; **deployed** to Cloudflare Pages with SPA redirect handling via `_redirects`

Additional Projects: College Social Life Web App (**Node.js, React, MongoDB**) • 2D Action RPG (**Unity, C#**) • Roblox UX/UI Redesign (**Figma**)

TECHNICAL SKILLS

Programming Languages: Python, C++, Java, JavaScript, Haskell, Dart (Flutter) **Machine Learning & AI:** Reinforcement Learning (PPO), Stable-Baselines 3, TensorBoard, Gymnasium, Reward Shaping **Web & Mobile Development:** Node.js, Express, React, React-Native, Flutter, MongoDB, SQLite **Game Development:** Unity, C#, 2D/3D Game Mechanics, UI Systems, Player Controllers **Systems & Tools:** Linux/UNIX, AWS, Azure, Git, GitHub, Docker, Virtual Machines, VS Code **Design & Analysis:** Figma, UX/UI Design, System Architecture, Data Structures & Algorithms **Additional:** Problem Solving, Cybersecurity, Networking, API Design, Technical Documentation

LANGUAGES

- **Languages:** English (Native), Spanish (Native)
